130. Rev. A. Tonnesen receives also £180 and house and land from the Umnini Trust.

131. There are also three other Preaching Places, the Returns for which are included in that for St. Patrick's, Umzinto.

138. Dr. Dalzell is assisted by three European and one coloured lay Evangelists. Services are conducted at a number of open-air Stations among the Native Kraals. It is impossible to state correctly the aggregate average attendance, as the attendances vary from four or six individuals to as many hundreds. The average attendance given above is that of the principal Service in the Church at the G.M.M. only. Of the baptisms two were adult Natives—husband and wife, and seven were Native children.

NOTE.—The Lutheran Churches are supported by the Hanoverian Mission Society and by contributions from the congregation.

REMARKS.

140 to 153. The above statistics do not include out-stations and preaching places where occasional services are held. The salaries of the Missionaries are derived from the American Board of Commissioners of Foreign Missions. The stipends of the Native Preachers are derived in part from the same source, in part from the Native Home Missionary Society, and in part from the churches in the colony to which they minister. The figures under "Evening School" also include the scholars attending the day-schools. The salary of a married missionary is £165, with house-rent.

144. There is also a chapel at Esidumbini, under the charge of a Native Teacher, T. Hanes, with a congregation of 150 coloured persons.
150. This Return includes Umtwalumi and Ixopo.

YEAR ENDED 31st DECEMBER, 1878.

1878.

POLITICAL FRANCHISE.

(Extract from Royal Charter, dated 15th July, 1856.)

§ 11. Every man, except as hereinafter excepted, above the age of twenty-one years, who possesses any immovable property to the value of £50, or who rents any such property of the yearly value of £10, within any Electoral District, and who is duly registered in manner hereinafter mentioned, shall be entitled to vote at the election of a member for such district. When any such property as aforesaid is occupied by more persons than one, as proprietors or renters, each of such occupants, being duly registered, shall be entitled to vote in respect of such property, provided the value, or, as the case may be, the rent thereof, be such as would entitle each of such joint occupants to a vote if equally divided among them.

§ 12. Aliens, not having been naturalised by some act of the Imperial Parliament, or of the Legislature of Natal, and persons who shall have been convicted of any treason, felony, or infamous offence, and shall not have received a free pardon, shall not be qualified to vote at any such election.

§ 13. No person shall be capable of being elected member of the Legislative Council unless he shall be a duly qualified and registered elector of some electoral district in the Colony, nor unless he shall have been invited to become a candidate for such election by at least ten electors of the county or borough which it is proposed he shall represent; nor unless such requisition shall have been transmitted to the Resident Magistrate of the county or borough, with a notification of the said candidate's acceptance thereof, at least fourteen days before such election is appointed to take place.

(Extract from Law 11, 1865, disqualifying certain Natives from exercising Electoral Franchise.)

1. Every male native, resident in this colony, or having the necessary property qualifications therein, whether subject to the operation of the Native Laws, customs, and usages in force in this Colony, or exempted therefrom, save as in this Law is provided, shall be disqualified from becoming a duly registered elector, and shall not be entitled to vote at the election of a member of the Legislative Council for any electoral district of the Colony of Natal.

2. Any male native inhabitant of this colony who shall show to the satisfaction of the Lieutenant Governor that he has been resident in this colony for a period of twelve years, or that he has been occasionally resident therein equivalent to a twelve years' residence, and who shall possess the requisite property qualification, and shall have been exempted [see Law 28, 1865] from the operation of Native Law for a period of seven years, and who shall produce to the Lieutenant Governor a certificate signed

by three duly qualified electors of European origin as near as may be to the form in Schedule A appended to this Law, and endorsed by a Justice of the Peace or Resident Magistrate of the district in which such natives resides, a statement to the effect that the Justice or Resident Magistrate endorsing said certificate has no reason to doubt the truth of said certificate, and the persons signing it are credible persons, shall be entitled to petition the Lieutenant Governor of Natal for a certificate to entitle him to be registered as a duly qualified elector for that electoral division in the colony in which such native may possess the requisite property qualification.

3. The Lieutenant Governor may direct that the application of any such native be published in the *Government Gazette*, and call upon any person having objection to any such native becoming a duly-qualified elector, to submit such objection in writing to the Secretary for Native Affairs, for the consideration of the Lieutenant Governor.

4. The Lieutenant Governor may make such rules and orders in and about the publication of any such application, and receiving, and entertaining, and deciding upon, any objection thereto, as may to him seem necessary.

5. The Lieutenant Governor may, at his discretion, grant or refuse to any native applying in manner aforesaid for such certificate, entitling him to be registered as a duly-qualified elector; provided always no such certificate shall be granted unless it shall have been published in manner described in Clause 3, at least three months previous to the granting thereof.

6. Every male native who shall have been exempted from the operation of Native Laws, customs, and usages, for a period of seven years, and who shall have obtained a certificate from the Lieutenant Governor, entitling such native to be registered as an elector, and who shall be possessed of the immoveable property qualification required by any Law in force for the time being in that behalf, shall be entitled to be duly registered as an elector, and, when registered, shall be entitled to vote at the election of a member of the Legislative Council for such district in which he may possess such property.

7. Every male native to whom such certificate shall have been granted by the Lieutenant Governor so long as he may possess the requisite property qualification, and who shall not be convicted of treason, or of any infamous crime, or of any crime which, if committed in England, would be felony, shall, subject to the provisions of Her Majesty's Letters Patent given at Westminster the Fifteenth day of July, in the Twentieth year of Her Majesty's reign, or any law in force for the time being in that behalf, be entitled to vote at the election of a member of the Legislative Council for the district in which he may possess such property qualification.

Steam will be got up, to convey Passengers only, on the sum of £5 for each trip being duly guaranteed ; and she will be at liberty to take Passengers or Goods on board when employed in towing vessels.

*Taxes, &c.*PORT AND HARBOUR DUES (*continued*).

All Passengers and all Goods required to be conveyed by the Tug must be conveyed to and from that vessel in the boats of the consignees of the ship on whose account the Tug is engaged for such purpose.

Any detention of the Tug by Ships, Passengers, or Boats over one hour, will be charged for at the rate of £3 for each hour entered on.

For towing vessels from the usual anchorage near the Custom House to the Bluff Channel, a charge of £5 will be made, provided the time does not exceed one hour, and £3 for each hour entered on over that time. Vessels required to be so moved must first be warped to the Tug at her moorings. If the Government warps are used, a charge of £1 per hour will be made; and if they be wilfully or carelessly chafed or cut, a charge of £1, on the joint responsibility of the Owner, Captain, or Agent, will be made. All applications for the services of the Tug in this respect must be made, in writing, to the Port Captain, and be signed by the Commander, or Owner, or Agent of the vessel, who will be held conjointly responsible for the expense.

2. *Stamps to be used.*—The charges in the above Tariff are to be represented by Stamps impressed, or affixed on, or to, the respective documents, or on, or to, paper covering the same.

3. *Fractional Sums.*—When, in such Tariff, the charge is imposed according to specified amounts, the like charge is to be deemed to be imposed in respect of fractional parts of such amounts, respectively.

4. *Covering Papers.*—The covering paper referred to in the second foregoing Rule, is to be furnished by the party paying for the Stamp, but the same paper may be used, in any one action, to cover all documents in respect of which the paper Stamps shall be affixed.

5. *Several Stamps.*—More than one Stamp may always be used to make up the requisite amount, but, as a general rule, no Stamp so used should be of less amount than one-sixth of the total required for the document.

6. *Application as to unsummoned Witness.*—Any party proposing to examine a witness who shall not have been summoned by the clerk, shall, for the purposes of such Tariff, have first to apply, in writing, to the clerk for leave so to examine, in form to this effect :—“ It is requested to be allowed to examine A. B., an unsummoned witness (*or, if requisite, use plural*), on behalf of plaintiff (or defendant),” and, if such request be duly stamped, the examination shall be proceeded with equally as it should have been if these Rules had not been issued.

7. *Obliteration.*—The clerk shall, upon first receiving any document with the proper impressed, affixed, or covering Stamps, obliterate the same by writing, or stamping in ink, the date of that day on such Stamp.

8. *Pending Suits.*—In respect of any cause, matter, or thing, depending in any of the said Courts, on the date of these Rules coming into operation, and the proceedings in which shall have been commenced before that date, the said clerks shall, in respect thereof, charge the fees imposed by the old Tariff, notwithstanding the partial repeal thereof, until the decision by any such Court of such cause, or other matter or thing.

9. *Rules coming into operation.*—These Rules came into operation on the First day of November, 1871.

IX.—LAND REVENUE.

By Government Notice of 31st March, 1849, it was directed that each farm granted under the conditions of the Proclamation of 10th February, 1848, and of 16th February, 1849, was chargeable from the date of the approval of the inspection, with a provisional annual quit-rent of £3.

By Proclamation of 2nd July, 1858, it was proclaimed that henceforth the Crown Lands of this Colony will be disposed of under the following conditions :—

1. The unappropriated Crown Lands in this Colony will be sold in freehold, and by public auction only.
2. Unless it is otherwise notified, the upset price for such sales will be four shillings (4s.) per acre, but the Governor, for the time being, will have the power to fix such higher upset price as the locality, or other circumstances, may render expedient, of which due notice will always be publicly given.
3. Persons desirous of becoming purchasers will apply, in writing, to the Colonial Secretary, respecting the land they wish to have put up for sale ; stating in what division it is situated, and, as far as practicable, its position, boundaries, and probable extent.

These applications, after being recorded in the Colonial Office, will be transmitted to the Surveyor General, who, if he sees no objection to the land being disposed of, will call upon the applicant to deposit with him the probable expense of the survey ; which expense will be borne by the eventual purchaser.

4. Should the applicant not become the purchaser, the amount deposited by him will be refunded when paid by the eventual purchaser ; but should no sale take place, no refund can be made.
5. Lands offered for sale will be advertised for one month in the *Government Gazette*, at the expiration of which time they will be sold by public auction.
6. Ten per cent. of the purchase money, together with the surveying expenses, must be paid on the day of sale, and the balance within one calendar month thereafter ; in default of which the ten per cent. and surveying expenses so paid will be forfeited to the Colonial Treasury.

By Government Notice No. 175, 1875, the sale of Crown Lands, except in particular cases, is suspended, until the upset price of such lands shall be fixed by law. During the ordinary Session of 1876 of the Legislative Council, the following four Laws were passed, namely :—Law “To provide for the more general occupation and improvement of lands alienated from the waste Crown Lands of the Crown within the Colony.” Law “To provide for the establishment of a Land and Immigration Board.” Law “To provide for the appropriation, for public purposes, of certain lands reserved as villages or townships.” Law “To provide for the appropriation for public purposes of certain lands reserved as commonage for the village of Weenen.”

Taxes, &c.

X.—RENTAL OF PASTORAL LANDS.

By Government Notice of 12th August, 1872, certain conditions, which have been approved by the Secretary of State, are published for general information.

Applications will be received by the Surveyor General for the lease of tracts of Crown Lands, not less than 1,000 acres, and not exceeding 2,000 acres in extent, at a yearly rental of not more than 1d. per acre, nor less than half that sum.

One year's rent must accompany each application.

Each lease may be converted into freehold at 5s. per acre, or a portion of the same, not less than 250 acres, and in the latter case the leaseholder shall be entitled to a further lease of twice the quantity converted into Freehold as grazing land at such rent, not exceeding 1d., and not less than $\frac{1}{2}$ d. per acre, as may be determined on by the Government. These lands are also held under certain conditions as to stock.

By Government Notice No. 154, 1875, grazing licenses will be granted in the Counties of Weenen, Klip River, and Newcastle, at an upset price of 1d. per acre and a fee of £2 2s.

XI.—TRANSFER DUTIES.

(Under Law No. 5, 1860.)

				£	s.	d.
On any Sale or Exchange of Landed Property, per cent.	4	0	0

By Law No. 10, 1863, two per cent. is payable on one-third of the rent of the term of all Leases of Landed Property.

By Law No. 7, 1864, four per cent. is payable on the purchase amount of a Lease, in addition to the foregoing.

XII.—POSTAGE.

[By-Law No. 11, 1867, all previous Ordinances relating to the Post Office and Postage, and all previous Proclamations and Government Notices relating thereto, or in any way inconsistent with the provisions of said Ordinance, were repealed; and the following are the rates of Postage fixed under the authority of that Law.]

XVII.—MARKET DUES.

Under authority of Ordinance No. 8, 1847, dues are leviable at markets established at any place not being a municipality at the following rates :—

Sellers, where produce does not exceed £20	2 per cent.
„ „ amounts to £20 or upwards	1 „

NOTE.—Ladysmith is the only place where a market has been established under this Ordinance.

Taxes, &c.

XVIII.—TOLLS.

All Tolls in the Colony were abolished from the 1st March, 1872, excepting that at the Berea, which forms part of the Municipal Revenue of the Borough of Durban. By Law No. 18, 1872, a proviso is made with respect to this Toll, that, on payment to the Government of a sum to be agreed upon, not exceeding £10,000, to the Town Council of the Borough of Durban, the power and authority for the levy and collection of the Toll shall vest in and be exercised by the Colonial Government. The Government have not yet taken any steps to acquire this right.

XIX.—FINES.

Fines are levied according to circumstances, after condemnation of the parties by a competent Court. They are either fixed by Law for particular offences, or left to the discretion of the Judge or Magistrate before whom the parties are tried.

XX.—REIMBURSEMENTS IN AID OF EXPENSES INCURRED BY GOVERNMENT,
AND SUMS REFUNDED AND SURCHARGES RECOVERED.

It is impossible to state the nature of the receipts brought to account under this head, since they depend, for the most part, upon circumstances and contingencies not to be foreseen.

XXI.—PROCEEDS OF SALE OF GOVERNMENT PROPERTY.

The proceeds under this head are, of course, variable, and cannot be defined with any degree of exactness, but generally arise from the sale of presents from Native Chiefs, school-books, and such sales of other Government property as cannot be classified under other heads of revenue.

XXII.—SALE OF AMMUNITION.

The receipts under this head are the proceeds of the sale of Ammunition, which by Laws No. 12 of 1862, and 6 of 1876, is placed under the control of the Colonial Government.

XXIII.—MISCELLANEOUS RECEIPTS.

Under this head are classified several minor receipts, among which are comprised the following :

1. SURVEY FEES.—These consist of sums paid by purchasers of Crown Lands for the survey of such lands, when performed by the Surveyor-General.
2. SCHOOL FEES.—For tuition at the Government Schools :—
 High Schools, Pietermaritzburg and Durban, 10s. a month for each pupil.
 Primary Schools, Pietermaritzburg and Durban, 1s. and 2s. a month—according to advancement.

For any number of acres between 150 and 20,000, not given in the above scale, the amount for the nearest number of acres in the scale is to be taken.

RECTILINEAR FIGURES OF MORE THAN FOUR SIDES.

The remuneration for four-sided figures, as above, to be increased by one-twelfth thereof for every additional side ; such sides as may be in common with any adjacent extent, surveyed at the same time, and by the same surveyor, being reckoned in the charge for each figure as half a side.

This increase is to be subject to disallowance by the Government if it should appear that the number of beacons has been unnecessarily increased.

ADDITIONAL ALLOWANCE FOR CURVILINEAR BOUNDARIES, AND BOUNDARIES PASSING THROUGH BUSH.

£ s. d.

For curvilinear boundaries, such as a river or a road :—

For every acre contained in the imaginary line or lines joining the points or stations taken by the surveyor on the said cur- vilinear boundary	3	0	0
For every square yard of dense bush requiring to be cut on any boundary	0	0	3

In the survey of any land on which the bush is not dense, although requiring to be cut on the boundary line, a less sum per yard will be allowed. And in any survey in which a boundary line so cleared of bush is in common with adjoining land, surveyed at the same time, and by the same surveyor, the remuneration for cutting bush will be reckoned at one-half the above sum.

Increase.			Decrease.			REMARKS.
£	s.	d.	£	s.	d.	
56,666	2	10	...			This large increase may be attributed to the moderate Tariff, as compared with that of the Cape Colony ; to the re-opening of Trade with the Transvaal, and to the general increase of business in 1878.
238	17	9	...			Increase Shipping Arrivals at the Port.
7,288	16	7	...			In 1876 the Dues received were £12,178, when there was an apparent rush to take Rum out of Bond ; the increased rate may be said to have commenced in 1878.
1,057	15	9	...			Caused by the increase of Customs' Dues.
1,420	0	0	...			This increase arises from the larger number of Ships arriving at the Port.
3,112	18	7	...			Occasioned by increased Imports and Exports.
20	11	3	...			Casual.
1,175	5	6	...			Payments of Arrears.
2,094	4	5	...			Revival of Land transactions.
796	3	8	...			Many are used in Judicial proceedings, which should properly go to Fines and Fees of Court.
1,249	18	9	...			Ordinary increase in the Native Population.
1,326	5	11	...			Material increase, arising from various causes, and during some four or five months large increase in the Military Population.
1,502	14	3	...			Considerable increase in the Native High Court, and in nearly all the Magistracies, increased number of offences.
313	2	3	...			Principally in the Land Transfer Office.
2,074	1	10	...			Re-payments on account of Amatongas.
...			836	15	6	Uncertain ; casual.
399	17	8	...			Casual.
3,445	8	10	...			Increased demand, and prices raised in consequence of high rates of freight.
...			68	6	11	Casual.
1,102	19	6	...			Large Sums placed at Interest from Railway Loan.
521	7	0	...			Casual.
292	14	5	...			In 1877 these Receipts were paid to the Secretary for Native Affairs, and did not appear as General Revenue.
43	0	0	...			In 1877 this Tax was placed with Special Receipts, and was £220 10s. There has been some difficulty in its collection.
...			206	5	9	Casual.

As it has been the custom to pay grants for the fourth quarter of the year on the 2nd January, the following schools which did not receive aid after the close of 1877 appear in the foregoing Return :—Bishop's College ; Josephine ; St. Mary's College ; Upper Glenwood ; St. Helena Evening ; Berea ; J. de Jongh, itinerant ; Van der Craght, itinerant ; and Lennox, itinerant.

The Council of Education thought it desirable that each year's expenditure should, as far as possible, be met by that year's vote ; and accordingly, a balance being on hand, five quarters' grants have been paid during the year. Besides these fixed grants, each school received capitation grants for attendance and results, details of which will be found further on in the report.

In the return of school fees collected, only fees for tuition have been inserted. No notice has been taken of the amounts paid by pupils for board, or of the estimated rent of any school-room either belonging to the teacher or given rent free.

The fees collected in the four Government Schools—£845 2s.—have been paid into the Treasury. Hermannsburg School is supported entirely by the Lutheran Church, and by the Government grant. There is no English child in attendance, and about 50 boys and girls, the children of German missionaries, receive board and education free. The £50 of school fees is the amount received for the education of children not connected with the mission.

Three of the 9 schools which ceased to be under inspection on the 31st December, 1877, were voluntarily given up—Josephine, St. Helena Evening, and the Berea. Three belonged to itinerant teachers, the sole aided survivors of a system which has done good service in the Colony, but which the Council did not deem desirable to perpetuate. Only four pupils were found attending St. Mary's College in October, 1877, and notice was given by Government that the grant of £100 a year would cease on the 31st December. Applications for a continuance of Government aid at the rate of £100 a year each were received in January from the masters of Bishop's College and Upper Glenwood, Durban. As these schools are supported by the well-to-do classes, and ought, from the rate of fees charged, to be self-supporting, and in view of the immediate establishment of High Schools in both towns, the Council decided to withdraw the grants hitherto given.

The teachers of Howick, Thornhill, St. Cyprian's, Berea Road, Isipingo, Lower Umkomas, Cornubia, and Newcastle, did not comply with the requirements of the Law, and as they had not been sufficiently long in charge of schools under inspection to receive the lower grade certificate, the grants to their schools were withdrawn on the 30th of June.

Mr. Michie left the Tongaat School rather suddenly in the beginning of October. As the Committee were not able to find a successor, the school was closed, and does not now receive Government aid. A school was begun at New Leeds under a certificated master on the 1st of July, and received a grant at the rate of £50 a

year. Thus, of the sixty-three schools which appear in the foregoing return, only forty-five have been at work under the Council during the whole of the year.

It has hitherto been the practice to enter in the Education Return the number of children enrolled during the year, *i.e.*, those who have attended school for even one day. Had this been done, the total number of children enrolled would have been 3,879. It was found, however, that many children had attended two or more schools in the course of the year, and that otherwise the figures were far from trustworthy. In Ireland no fewer than 1,023,617 children made any attendance in 1877, against an average attendance of only 418,063. Accordingly, only the number of regular scholars, as verified by inspection of the schools and school registers, has been inserted in the return. The average number in regular monthly attendance for the year is 2,437. The very large number—22½ per cent.—of daily absentees is due almost entirely to the great amount of sickness which has prevailed during the year among children all over the Colony. The grant made in respect of pupils who attend school not fewer than 175 days in the year has wonderfully diminished the number of preventable absences.

Of the 2,501 children at school, 905 are under eight years of age ; 1,060 between eight and twelve ; 493 between twelve and sixteen ; and 43 over sixteen. There is still the utmost difficulty even in our secondary schools to get children to remain at school after they are sixteen years of age. Eighteen of the 43 pupils over sixteen years of age are Coolie adults attending the Rev. Mr. Stott's Indian Schools in Durban.

REVENUE AND EXPENDITURE.

“The Council of Education shall be charged with the duty of administering such sums of money as may be voted by the Legislative Council for the purpose of carrying out the provisions of the Law, together with such other funds as may in any manner become disposable under the Law.” (Prim. Educ. Law, Sect. 4.)

Government High School fees must by Law be paid into the Treasury ; Government Primary School fees, by resolution of the Council of Education, also form part of the General Revenue. The only funds at the disposal of the Council during the year were the sums voted for education by the Legislative Council. This amount, unless by permission of His Excellency, could be spent only in accordance with the items of the vote. Many charges and expenses, unforeseen when the Estimates were drawn up, were continually being made and incurred for the efficient carrying out of the Law, and to these His Excellency's consent was readily given on the understanding that the Council's expenditure would be kept strictly within the £10,000 voted for education.

As it has been the custom to pay grants for the fourth quarter of the year on the 2nd January, the following schools which did not receive aid after the close of 1877 appear in the foregoing Return :—Bishop's College ; Josephine ; St. Mary's College ; Upper Glenwood ; St. Helena Evening ; Berea ; J. de Jongh, itinerant ; Van der Craght, itinerant ; and Lennox, itinerant.

The Council of Education thought it desirable that each year's expenditure should, as far as possible, be met by that year's vote ; and accordingly, a balance being on hand, five quarters' grants have been paid during the year. Besides these fixed grants, each school received capitation grants for attendance and results, details of which will be found further on in the report.

In the return of school fees collected, only fees for tuition have been inserted. No notice has been taken of the amounts paid by pupils for board, or of the estimated rent of any school-room either belonging to the teacher or given rent free.

Deducting the fees from the the expenditure, adding £150 as estimated rent for each of the Model Primary Schools, and reckoning the number in regular monthly attendance respectively at 23, 53, 214, and 202, we find that the cost to Government, exclusive of inspection, has been for each pupil at the Pietermaritzburg High School, £26 7s. 8d.; at the Durban High School, £6 18s. 2d.; at the Pietermaritzburg Model Primary School, £3 3s. 8d.; and at the Durban Model Primary School, £3 17s. In connexion with the expenditure of the Pietermaritzburg High School, it is to be noted that the former Head Master, Mr. Forder, received half-salary to the end of the year, and the former assistant, Mr. Frampton, full salary to 22nd June, although neither taught in the school after the 12th March.

The following Table of Comparisons may be found interesting :—

(a.) Does not include amount expended on school-buildings, furniture, and books.
 (b.) £5,201 0s. 10d. for salaries, and £4,840 19s. for school-buildings, rent, furniture, etc.
 (c.) Total cost, deducting fees paid into Treasury, and exclusive of £1,000 voted for Girls' Model School now being built, and of grants for the fourth quarter of 1877.

The rate per Scholar for the different Districts of the Colony is:—Pietermaritzburg City, £2 9s. 4½d.; Pietermaritzburg County, £2 6s. 6d.; Durban Town, £2 5s. 7d.; Durban County, £2 11s.; Alexandra County, £2 6s. 1d.; Victoria County, £2 16s. 9d.; Umvoti County, £2 4s. 2d.; Weenen County, £3 7s. 6d.; and Klip River County, £4 8s. 6d. This rate is high, but will decrease as the Colony fills up. Want of population is at the root of many of our educational difficulties.

COINS.

With the exception of some Australian currency, in sovereigns and half-sovereigns, the coins in circulation are exclusively British, and are the legal tender in discharge of all debts ; consisting, in gold, of sovereigns and half-sovereigns ; in silver, of crowns, half-crowns, florins, shillings, sixpences, fourpenny and threepenny pieces ; and in copper, of pence and half-pence.

The coins in circulation have not in any way been defaced, altered, diminished, or augmented in their respective values.

Indian rupees are not accepted as current coinage under authority of Circular to all Collectors of Revenue, dated August, 1876.

AMOUNT OF COIN IN CIRCULATION.

This cannot be correctly ascertained ; but the probable amount may be estimated at not more than £300,000.

The Natal Bank is a Chartered Bank, and has a power to increase to £500,000 from time to time, as may be found expedient, and to amalgamate with any other Banking Institution.

ACCOUNTS.

All accounts, both public and private, are rendered in this Colony in British money ; and biddings at Sales by Auction are made also in British money.

WEIGHTS.

Weights of the Imperial Standard were legalised and brought into use in this Colony under the Ordinance No. 11, 1852.

Among the Dutch Inhabitants, and in their commerce with English, weights of the standard of Amsterdam are occasionally used ; the proportion being 92 lbs. Dutch to 100 lbs. English.

MEASURES.

The Standard Measures in this Colony are the Imperial, and were legalised by Ordinance No. 11, 1852.

The Dutch inhabitants, however, in disposing of grain, are in the habit of adhering to the old Dutch standard, viz. :—

1 Schepel, equal ·766 old Winchester Bushels, or ·743 Imperial.

1 Muid, equal to 4 Schepels, or 3·065 old Winchester Bushels, or 2·972 Imperial.

1 Load, equal to 10 Muids, or 30·65 old Winchester Bushels, or 29·72 Imperial.

Thus 107 Dutch Schepels are equal to 82 Winchester Bushels.

4 „ „ about 3 Imperial Bushels.

11 „ „ about 1 Quarter.

The measurement of Land in Natal, since it was proclaimed a British Colony, has always been Imperial, viz., by acres, roods, perches, &c.

Since the commencement of selling at the Pietermaritzburg Market of all produce by Imperial weights and measures, the practice of dealing by the old Dutch standard has been gradually discontinued, though still adhered to in some of the country districts.

Freestone, Shale, Limestone.						<p>The Sugar Machinery has on the whole given satisfaction, and new mills are still being erected. The Central Mill on Smerdon's Flat is expected to start some time in February, and will be the largest Manufactory in the Colony.</p> <p>Since taking the last return, 12 months ago, there has been a large mill erected on the Effingham Estate for the manufacture of concrete, and the machinery has given every satisfaction. There has also new machinery been put down on the Umtata Estate; I cannot say how it has answered, as returns are refused on this Estate.</p>

						<p>The Sugar Crop is very much below the estimate, on account of the drought. I have never seen the cane-fields look so bad since it was first started in Natal. There is also a rust or smut in the cane, known as "China cane," which is spreading very fast, and on some estates destroying whole fields.</p> <p>The crop has also been short this season in some parts, but not so bad as might have been expected.</p> <p>The Natives have very little planted this year, on account of the dry weather running so late into the season, but some are still planting, others have planted very little, because they were expecting to leave this County for Up-Country, so that I expect the Kafirs in my Ward to be short of mealies this coming year.</p> <p>I am sorry to say the re-returns are not as accurate as they ought to be, as several people have refused to give any returns, which I have had to estimate ; there are also a great many away at the front, so that returns of their estates could not be taken from them, and those I had to guess at.</p>

						The whole of the coffee machinery has been out of use nearly ever since the Umgeni Coffee Works were started. On some of the estates they have been left where they were last used, on others they have been broken up and used for other purposes, and some have sold, so that there is very little coffee machinery in this Ward.

GOOD CONDUCT RATIONS.

After two months uninterrupted good conduct, Prisoners shall receive the additional rations named in the Dietary Scale ; and after six months in the First Class, as a further reward for good conduct, Prisoners shall receive a ration of Tea or Coffee, and Sugar, for Supper, instead of Gruel.

But in every case of misconduct against the Rules of the Gaol, or making complaints that may be deemed by the Board of Visitors to be frivolous and vexatious, the Prisoner may be awarded to be deprived of the extra allowance of either Meat or Tea for one month.

* NOTE.—First-class Prisoners, on Second-class Diet, to have, on Sundays, 12 ozs. of Meat, instead of 8 ozs.
 * First-class Prisoners to have 1 lb. of Meat on three days a week, instead of 12 ozs. Meat.
 † When Milk is not procurable, His Excellency the Lieutenant Governor sanctions an equivalent of 12 ozs. Bread, with Coffee and Sugar, instead of 12 ozs. Meal and half-pint Milk.
 European Women to have ½ less solids in the scale, according to the class of diet.
 Europeans, not at hard labour, to have ½ less of solids—Sick Diet.

REPORT OF THE ATTORNEY GENERAL ON CRIME, FOR THE YEAR 1878.

The foregoing tables have, as usual, been compiled from the returns furnished by the respective Resident Magistrates for the several Divisions into which the Colony is divided for Judicial purposes.

Many of the remarks made by me in my Report on Crime for the Year 1877 apply to the Returns now furnished, and the explanations as to inaccuracies in figures then made are equally applicable to the accompanying statistics.

The total number of Offences reported in 1878 was 12,320 as against 11,398 in 1877.

The Native High Court Returns, which materially swell the totals in the foregoing Return IV., are as follows :—

	Total.	Other Offences against the Person.	Cattle Stealing, &c.
Judgment for the Crown	811	697	114
Judgment for the Prisoner	55	36	19
Case fell through for want of Prosecution ...	27	...	27

The large number of 697 is due to the faction fights, of which there were several, in which large bodies of Natives were engaged during the year.

From the Return of the Protector of Indian Immigrants it would appear that he adjudicated upon 46 cases relating to Indian Immigrants during the year. Of these 32 had reference to the powers conferred upon the Protector as Judge in questions of divorce, adultery, &c., arising among the Indian population.

Preparatory Examinations in 410 cases have been forwarded me, this compares unfavourably with 1877, when the number was 347.

Although the Returns show an increase of crime during the past year, yet the increase is not in the more serious classes of crime, and there appears to be nothing of sufficient importance to render special remark necessary.

M. H. GALLWEY,
Attorney General.

Attorney General's Office,
9th July, 1879.

QUESTION II.—(continued.)

(I.) What quantity of water is available for each patient every day?—An unlimited supply.

What is the source of the water supply?—From a running stream ; a branch of the stream which supplies the City.

What is the quality of the water?—Impure.

(II.) Detail the arrangements as to baths and lavatories?—Two small rooms, used as bath rooms, each containing a fixed enamelled iron bath, one for hot water, the other for cold ; the water being supplied to each bath and discharged by means of iron-piping. Portable baths, when ordered, are given by the patient's bedside. Each patient is bathed on admission. There is a lavatory fitted with four hand basins and three foot basins ; water is supplied and discharged by iron-piping.

(III.) What is the system of sewerage, and what the condition of the privies?—There are six latrines situated 115 feet from the nearest Ward at the back of the Hospital, the soil being washed into the river at the bottom of the hill on which they are erected by a constant stream of water. Night stools are used, strict attention being had to their being kept perfectly clean. The latrines are in a very bad state of repair.

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the Year 1878.

Specifying the character of the visit in respect to notice.	And stating the official position of the Visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a Committee of the Governing Body.
By Appointment	Once a month.
Of Surprise	By the Governor.		

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion ; and if not, on how many occasions they were not so produced?—Always produced if required by the visitor.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination ?

(III.) State also how many reports of the following kinds have come under the notice of the Governor :

- * (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited.
- (b) Reports by persons charged with the immediate management of the Hospital.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital.—The Reports of the Medical Officer are addressed to the Trustees once a month. Sub-Committee of Trustees have reported on the financial state of the Hospital.

* NOTE.—Copies of above Reports, if any, to be appended.

QUESTION II.—(continued.)

(I.) What quantity of water is available for each patient every day?—Sufficient rain-water in Summer for cooking and drinking purposes ; but in Winter and dry seasons the supply runs short, when the want is partially remedied by procuring casks of water from the River Umgeni.

What is the source of the water supply?—Five iron tanks (400 gallons each), and one underground tank. To two of the iron tanks the supply of water is but scanty, as they receive only what rain falls from the roof of two small bath-rooms. Water is also obtained from a well sunk on the premises ; it is only fit for washing purposes.

What is the quality of the water?—The rain-water is good ; the well-water impure, owing to unhealthy matter derived from the ground service.

(II.) Detail the arrangements as to baths and lavatories?—A bath-house exists, but there is no water laid on to it. The small bath-rooms off the Wards are used as store-rooms. Bed-side, warm, hip, foot, and warm vapour baths are available.

(III.) What is the system of sewerage, and what the condition of the privies?—The long wooden drain-pipe has been thrown into disuse by the substitution of an increased number of night-soil buckets, which are removed every other day. The dry-earth system has been continued during the year, but the patients will not trouble themselves to observe the instructions, and some self-supplying arrangement might be adopted.

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the Year 1878.

Specifying the character of the visit in respect to notice.	And stating the official position of the Visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector, as Magistrate, Acting Magistrate, or authorised substitute.	By a Committee of the Governing Body.
By Appointment
Of Surprise 	34	32 *

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion ; and if not, on how many occasions they were not so produced?—Books not specially inspected on any occasion, but were frequently examined with the view to improvement in the system of keeping them.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination?—Were on the preceding occasions found generally made up and in working order.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :

- † (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited.—Monthly Ration Return, showing all expenses incurred during the month. Monthly Return of Fees received and paid into the Treasury.
- (b) Reports by persons charged with the immediate management of the Hospital.—Monthly Return of Fees due and outstanding. Monthly Return of Nominal List of Patients.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital.—Annual Report for the Blue Book.

* A Committee of four visiting officers has been appointed by the Lieutenant Governor ; who take turn weekly to visit the Hospital, and whose general duties are to scrutinize every branch of the establishment, and bring forward any point upon which they may choose to suggest a remark, they have visited constantly during the year, and their suggestions and observations have proved of great assistance to the authorities, and benefit to the sick.

† Copies of these Reports to be appended, if any.

QUESTION IV.

Fill up the following Table of Cases of each kind of Disease treated in the Hospital in the Year, with the number of Deaths from each such Disease.

REPORT.

IN reporting upon the Durban Hospital for the Year 1878, there is nothing demanding special notice, beyond that there has been a visitation of Fever upon this town and neighbourhood ; it set in about the end of August, and caused great mortality amongst the children, and, at one time, there were so many as sixteen patients laid up in the Hospital from this disease. The long-continued draught, which deprived the inhabitants of any supply of pure water was, doubtless, the cause of the epidemic, for the people were compelled to cook their food with, and drink of the foul water of the wells, which were very low and charged with miasmatic matter. Two cases of Typhoid Fever were admitted, but many of those mentioned in the table further on as "Febris C.C.," partook in a measure of the symptoms of this form of fever, but not sufficiently marked to require them to be so classified. There was delirium frequently present, but abdominal disturbance was rare.

As the New Hospital is fast approaching completion, and will be occupied, probably, early in March next, it is not necessary to furnish any report upon the present establishment as to its condition or wants, and as there is a steady annual increase in the number of applicants requiring in-door treatment, it is happening well that enlarged accommodation is being provided.

The total number of patients, in-door, were 568 ; of whites 265, coloured persons 321 ; and of these there were, of males 534, and of females 52. There were discharged 475, died 63 males and 6 females, leaving 39 males and 3 females under treatment.

These patients may be further classified, thus :—

Europeans	{	Males ...	239	Coolies ...	{	Males ...	193	Natives	{	Males ...	102
		Females ...	26			Females ...	15			Females ...	11

but these again might be classed into various nationalities, as the population here is of so many different races, but the classification given is sufficiently close upon which to compile a report.

The following Table gives a comparison of the different years, and 1878 shows an increase, but not disproportionate to the increased population, and therefore does not imply that the amount of illness has increased.

Year.	Treated.	Died.	Year.	Treated.	Died.

The greatest duration of, in any single instance	Seven days in the case of a Native.		

In reference to the above table, state :—

- I. The authority on which patients are restrained?—The inmates are kept in an open and well-shaded garden during the day, many of whom suffer from periodical attacks, some are noisy and violent, whilst others tear off their clothes and thereby expose themselves ; in such cases the patient is locked up in a room by direction of the keeper or his assistant.
- II. The kinds of mechanical restraint in use?—Handcuffs ; the District Surgeon has directed that the use of these articles be in future discontinued, and that seclusion under lock and key be only resorted to.
- III. How many cases of cruelty by attendants to patients have been brought to the notice of the proper authority, and what was the result in each case?—None.
- IV. The number of cases of injury to patients :
 - (I.) By themselves?—None.
 - (II.) By other patients?—Three cases ; but none were of a serious nature, being chiefly quarrels between the white men during the night time.
 - (III.) By attendants?—None.

OCCUPATION.

The extent of grounds are eight acres, two roods, and ten perches.

The airing courts ; a large garden having large shady trees is used as an airing court. Eight acres, two roods, and 10 perches belonging to the Asylum. One acre, two roods, and thirty-four perches of this ground is partially enclosed, being a garden where the patients stay during the day, a portion of the remainder is under cultivation, and some of the coloured inmates exercise themselves by doing light work therein.

OCCUPATION (continued.)

Are the patients, as a rule, given daily exercise, their health permitting?—Yes.

Are they confined to airing courts, or allowed to walk in other grounds, and sent beyond the Asylum?—The whole of the inmates, their health and weather permitting, are out in the garden from 6.30 a.m. to 5.30 p.m. in Summer, and from 7 a.m. to 5.30 p.m. during the Winter months.

Are any means taken to amuse the patients, or to induce them to amuse themselves? Detail them.—The following games have been provided by the Government: 1 chessboard, 1 backgammon ditto, 1 draught ditto, 2 concertinas, and marbles. The *Graphic* papers for 1878 were given by Dr. Gordon, District Surgeon, for use of the patients.

How many religious services were held in 1878?—Eighteen.

What was the average attendance?—Six.

In what building, and how many could it contain?—No. 2 Room, Main Building. Large enough to accommodate twenty inmates.

RESIDENT MAGISTRATES.

1878.

UMGENI DIVISION.

The year 1878, which, during its earlier months, threatened disaster to many, closed as favourably as it opened unfavourably, upon the Agricultural interests of the Division.

The unusual dryness of the season was more or less severely felt by all, the stock-breeders having to complain of losses no less than the agriculturalist.

The mortality amongst cattle has been unusually great, and is chiefly attributable to two causes—poverty, resulting from the destruction of grass by drought and fires, and an increased demand for draught oxen during an unfavourable season. The high rates of carriage tempted many to employ their oxen under the most adverse conditions as regards the life of the animals: Losses were numerous exceeding in value in many cases, the gain in working them.

Sheep, on the other hand, in spite of some drawbacks, show a considerable increase over the previous year. The yield of wool has also been most satisfactory, and to supply the increased demand for meat, a ready sale has been found for wethers at advanced prices. Under efficient inspection the scab is on the decline, and more care and attention on the part of owners have been manifested towards the eradication of this once prevalent disease. But even with every care, many farmers, and especially those whose lands are intersected by main roads, find the greatest difficulty in keeping their flocks up to the required standard of cleanliness. To protect themselves from the evils of contagion, as well as to prevent their stock from straying, some of the more enterprising have inclosed their lands with wire fencing. Several miles of this kind of fencing have already been erected, inclosing many thousands of acres, and more land is in process of being thus improved.

Under this head, it may be stated that the opinion is entertained, that all of the more elevated portions of the Division will ultimately be converted into sheep farms, including such lands as were selected for the sake of their ranges of noble forests, now rapidly being denuded of the timber, which formed their first attraction.

There has been little mortality from disease among horses, and the high prices they now command, has given this enterprise a greater stimulus than it has received for many years past.

The ready sale at unprecedented prices of farm produce of all kinds, to some extent compensated for small returns in the principal crops. To the destructive effects of drought, must be added a new visitant in the form of myriads of caterpillars, which appeared in many places, destroying the green crops and even the grass itself. The yield of oat hay, from these causes, formed but a fraction of that of ordinary years. The standing crops at the close of the year were in a flourishing condition, and promised an abundant harvest, although in some parts the lateness of the spring rains prevented the same breadth of land being planted. One of the novelties of the year, has been the introduction of a steam plough, to be used on a large Agricultural Farm near Table Mountain. Machinery of different kinds is becoming more commonly used than formerly.

The Natives have not suffered in this Division, to the extent observed elsewhere, from scarcity of food, consequent upon the partial failure of their crops of maize. The very slight increase in the number seeking employment, may serve to illustrate the favourable circumstances in which they have been placed. No improvement has been noticed in their mode of agriculture. While much of the land in their occupation is held on short and uncertain tenure, their standard of cultivation will remain pretty much as it is. It is easier for them to break up new land than to improve the old, of which they may be summarily dispossessed. The large quantity of *amabele* raised by them is used almost

exclusively in the making of beer, but their most important article of husbandry is maize, the great staple of the county, whose facility of cultivation and generally exuberant returns do not conduce to habits of systematic and hardy industry.

Natives upon mission lands, both by example and circumstance, have advanced in agriculture, and add to their ordinary crops a variety of esculents, for which a ready sale is always to be found. Many of them possess small plots of land in freehold. The work among them is chiefly done by the men; the women taking part only in the lighter labours of the field. In this respect they present an honourable contrast to other Natives.

The uncertain character of Native Labour is forcing farmers to employ Coolies, the number of whom is on the increase. Some who have a large Native tenantry, are taking the lead in their introduction. Although the demand for labour has been fairly met during the year, it is felt that the ordinary supply is inadequate to develop the resources of the soil. The want of a steady stream of labour, is still the main obstacle to profitable farming on a larger scale than any hitherto tried, as without this essential element to success, energy and capital would alike be fruitlessly expended.

As the increase of population is but slow, progression is limited in the occupation of new lands. Still some advance has been made in both of these directions, while many permanent improvements and additions have been made to farms already occupied. Much useful wire and stone fencing has been erected, and plantations containing many varieties of valuable wood, are much more numerous and extensive.

UMLAZI DIVISION.

The lengthened drought which affected this country, and specially so during the latter part of 1878, caused a serious check to Agriculture, and more particularly affected the Sugar Crop, which is the principal produce of this Division; and this drought, together with the severe frost of last winter, has materially reduced the yield of Sugar.

I am informed that one-half, and, in some cases, one-third, only of the anticipated returns will be realised.

The loss, however, is averaged throughout to be from three-fourths to one ton of Sugar per acre, and the total loss will amount to about 300 tons.

The old canes are all lost, but it is hoped that the crops of younger canes will be saved, and the present weather, favourable to the growth of cane, induces a belief that the actual loss will be retrieved at the ensuing crushing season.

Mealies, although planted some two months later this year than usually, are owing to the abundant rains which now almost daily visit the district, growing luxuriantly; the harvest it is hoped will only be retarded one month beyond the usual time of reaping, and the crops promise to be most beautiful, and will, without doubt, much exceed the ingathering of 1877.

The Root Crops are also in a very satisfactory condition, and the Natives having planted largely of sweet potatoes and other esculent roots, their food supply for the coming season will exceed the demand.

The yield of Coffee has been larger this season than during the last two or three seasons; yet it has fallen far short of expectation, such plantations as are still being cultivated having suffered much from

drought and the continued hot winds. Arrowroot, from the above causes, has been less abundant than last year.

The acreage of cultivation by Indians is on the increase, and all those free from labour contracts appear most anxious to become small agriculturalists, and have lands from European farmers at good rentals, and in almost every instance are successful cultivators.

They have this year large crops of maize and ground nuts, the flourishing appearance of which awake, the expectation of plentiful harvests.

The condition of these free Indian labourers is in every way satisfactory ; they obtain remunerative prices for their cereals and fruits, and are not only enabled to employ native labour, and that of less wealthy brethren of their class, but are enabled to afford themselves luxuries, such as providing for their wives and children a profusion of gold and silver ornaments.

The breeding of stock in this Division is but on a very small scale, there being only two or three individuals throughout the County who devote themselves to this branch of farming, and one of them, I believe the principal breeder of stock, has this year left the district.

Cattle, however, would have done very well this year and prospered satisfactorily, but for the want of grass occasioned by the drought ; yet, although but scanty provision of fodder had been made for the consumption of the winter months, but few cattle have died from poverty or want of food, and their lost condition will be regained in the ensuing summer.

They have throughout the year enjoyed an immunity from lung-sickness, and red water has been scarce. Horses have done better than in former years ; they have been free from horse-sickness, and, although during the winter months they have been affected with colds and other ailments, yet in no instance have these proved fatal.

The want of Labour this year has not been so keenly felt as in former years, the Natives more readily turning out to work on account of the decrease of their food, and the fear that the continued drought would prevent their providing for the support of their families ; yet wages have kept their high rates, and there is still the need for skilled European labour at cheaper rates than procurable at the present, and domestic servants (European), male and female, are very much required.

The great boon of improved means of transport by Railway is rapidly causing improvements in the country districts. In the Village of Pinetown, since the opening of the Railway, new hotels have been erected, new canteens and shops have been opened, a new school for girls has been instituted, and new houses have been built ; thus in size and prosperity this little stagnating village is rapidly increasing.

At Belair and Northdene, two stations on the line from Durban to Pinetown, houses are being erected, and will, no doubt, at an early date, form villages within very easy access of the Port.

When the South Coast Line is opened, and joins Durban to Isipingo, it will infuse new life and prosperity to that very quiescent village.

Further down the South Coast, on the banks of the River Illovo, a number of free Coolies have located themselves, and have made of that hitherto unoccupied and unproductive district a thriving Indian settlement.

The Natives are prosperous and contented, and at the last collection cheerfully paid the Hut Tax ; yet it is to be deplored that drunkenness, from the use of " shimyan " and Natal rum, is greatly on the increase amongst them.

The Roads throughout the Division, especially the South Coast, are much in need of repairs ; the metal

available for their construction appears to be unable to withstand the constant and heavy traffic to which they are subjected.

There has been no crime of a serious import committed during last year, and, beyond the commission of petty thefts and such quarrels whence petty assaults have emanated, there has been nothing to disturb the peace and well-being of the community.

The Native population has slightly decreased during the latter end of the year owing to the Zulu disturbances, which created a panic amongst the Amatonga labourers, who left the district in large numbers for the purpose of returning to their homes beyond the Zulu territory.

KLIP RIVER DIVISION.

STOCK AND AGRICULTURE.

The Statistics afforded by the Blue Book Returns for 1878, and those for the preceding Year 1877, may be summarised under the following principal heads :—

	1878.	1877.
White Population	983	938
Woolled Sheep	41,139	50,014
Angora Goats	13,245	16,542

PRODUCE.

Wheat	624 muids.	1,320 muids.
Wool	114,850 lbs.	106,940 lbs.
Tobacco	3,520 lbs.	4,450 lbs.
Butter	36,850 lbs.	51,300 lbs.

The Rainfall in the Spring of 1878 having been far more abundant than in the two previous Seasons, an improvement both in Stock and in Agriculture is manifest.

EDUCATION.

The Government Day School was opened during the past Year by the Master, Mr. Williams. The average attendance was 31. A very urgent need exists for a School-room, which might with advantage be built without waiting for the erection of the whole proposed Structure.

PUBLIC WORKS.

Public Works within the County during 1878 were limited to the partial repair of the Main Roads, the leading of the Water through the Village of Ladysmith, and the completion of the Laager at the same place. The great traffic of Wagons on the Roads has kept them much out of order. The Klip River Drift at Ladysmith is said by all who use it to be the worst and most difficult spot between Durban and the Zulu Border. The need of a Bridge over this River becomes daily more urgent ; but the Drift could meanwhile be easily repaired and made passable.

GUNPOWDER AND FIREARMS.

The number of Permits issued for the Purchase of Gunpowder was 276, the aggregate quantity being 1,159 lbs. The number of Firearms registered was 13, and of Firearms transferred by permit 131.

MISCELLANEOUS.

The operations against the Zulu Chief Cetywayo became, during the latter portion of the past year,

the absorbing subject of interest in this District as throughout the Colony. It is needless to state that the demands upon transport, produce, and every saleable article were immensely increased, and that prices have risen in proportion. No disturbance has occurred within this Division. Litigation has been almost suspended, and it is remarkable that the Native Crime List has been nearly a blank.

NEWCASTLE DIVISION.

The Division of Newcastle forms the Northernmost portion of the Colony of Natal, and lies like a wedge between the Orange Free State and the Transvaal.

The Division is computed at 2,500 square miles, and is in the shape of a triangle, of which the sides are respectively, the watershed of the Drakensberg, the watershed of the Biggarsberg and the Buffalo River from its sources as far as Rorke's Drift. Across the Buffalo and along its course run the range of hills known as the "Balele Berg," from the well-known chief Langalibalele, whose tribe once inhabited that portion of the country. The whole, when surveyed from a height, looks like one large enclosed sea of veldt, with headlands jutting into it; but it is of course more or less broken by spurs from the bergs, nude features and "dongas." The Division is divided into two wards, to each of which a Field-cornet—who is a sort of Assistant Magistrate—is appointed. One of these wards being far too large for proper supervision by one man, the Government has consented to divide it into two parts, and to appoint a third Field-cornet; but the Division has not yet been formally made. The average height of the District is about 4,000 feet above the sea level, and it is healthy alike for man and beast in all parts throughout the year.

There is a good deal of timber and bush along the slopes of the Drakensberg wherever it can find shelter from the strong winds and hot blasts and can enjoy the morning sun. The "yellow wood" is the only large timber; but there are many kinds of hard wood, such as the "bitter almond," "wild chesnut," &c., which are useful for a variety of purposes.

The number of licenses granted in 1878 for cutting wood was 63; but it is feared that there is much unlicensed cutting. To counteract this, natives have been placed at intervals along the Berg to watch the bushes, and all licenses have to be countersigned by the Field-cornet, and returned to this Office at the expiration of the month.

These measures, however, are not sufficient for the proper protection and preservation of the Forests, and the subject is receiving the attention of the Government.

Coal there is abundance of everywhere. One sees it all over the District, cropping up in the spruits where the super-strata have been washed away by the action of the water. That in the Dundee District is by far the best, and is found in seams from six to eight feet thick. There is no regular mining work carried on, but a good deal is dug out from near the surface for local requirements. A good deal was dug out in 1878 for the use of the troops, some being sent down to Pietermaritzburg by the Commissariat Department. The current price is about 20s. a ton.

Although the District is well watered during the summer months by numerous small rivers and streams, there is a scarcity of water during the winter, as all these become more or less dried up. Indeed, last year the principal rivers, the Ingagane, the Incandu and the Buffalo, almost ceased to run for about two months. Springs, however, are plentiful; and these are mostly depended on during the

winter. This fact marks the District as a pastoral and not an agricultural one ; although, no doubt, more will be done in agriculture when the Railway reaches Newcastle, and produce can be easily conveyed to a good market.

I am of opinion that it would be much more economical, less troublesome, and the roads would be kept in much better repair if, instead of the present system of calling out road parties under Government overseers, the roads were let out in sections to men living in the District, where such could be got. The roads, when once in good repair, might be easily kept so with a few men constantly employed ; but under the present system all the men must be concentrated under one or two overseers, and they cannot be distributed along the road so as to give that stitch in time which saves nine.

A good strong Laager, with barrack and stable accommodation, has now been built about ten miles from Dundee, on a high plateau overlooking the Border. The intention was to place there a troop of the Natal Mounted Police. At present, however, it is occupied by farmers of the District, who resorted thither at the outbreak of the war, and is guarded by some of the Mounted Volunteers. Another Laager, six miles from Dundee, in the opposite direction, was commenced by the people of the District, but it has not yet been finished.

There are two Volunteer Corps in the District—one at Newcastle, called the “Newcastle Mounted Rifles,” numbering about 28, and the other in the Dundee District, called the “Buffalo Border Guard,” numbering about 20. Both these Corps were called out for the defence of the Border in December, 1878.

Newcastle, the seat of Magistracy, and the only town in the Division, has, since the advent of the military (in 1877), grown rapidly. The population is now estimated at 250, exclusive of the military. During 1878, many houses were completed and commenced, and much progress was made. The want of a good supply of water has long been felt, and the construction of a watercourse leading water from the river into the town, is anxiously looked forward for, the Government having voted £2,000 for the purpose.

I have already spoken of the coal at Dundee ; and there can be little doubt that much industry will spring up in the place on the advent of the Railway, which, in all probability, will pass through there. Under these circumstances I would strongly urge on the Government the laying out of a Township in that locality, before the little Government land that is left there is sold.

The only public buildings in this district are the Court House, Gaol, Magistrate's Office, Post Office, and Gaoler's quarters, which, together with an enclosed yard, all form one block, for defensive purposes termed the “Laager.” A good well, 30 feet deep, with a diameter of 5 feet, all bricked in, was dug in the yard last year. It has afforded a good supply of water for all purposes, and is a most necessary addition for the proper defence of the Laager.

The Gaol consists of four good cells, but more accommodation is required for Gaol stores, etc., and other additions and alterations are proposed to be carried out. The chief work done by the prisoners during the year was to make and harden with ironstone gravel the main street through the town.

The European population of the District is estimated at 1,469. There is one Representative of the Division in the Legislative Council, and there are 213 registered electors. Exclusive of those living in the town of Newcastle, and keeping accommodation houses along the road, quite two-thirds of the population are Dutch. Most of these people immigrated originally from the Old Colony, and obtained

their farms in this Division in 1855-7, when they were very poor. They are now well off and prosperous, buying land wherever they can get it, owning large flocks and herds, and having comfortable homesteads. They speak and live after the manner of the Dutch of the Free State and Transvaal, with whom they are closely connected. There is very little crime of any kind among them, but their mode of life is calculated to make them slothful and slovenly. That they are very little educated it is true, but there are many excuses which might be pleaded for this; and it is to be regretted that even now the means of educating their children are so indifferent.

Branch Courts are held once every three months at Dundee, Hatley's, and Mr. M. C. Adendorff's. Two or three cases of indiscriminate grass burning were detected and punished; but it is extremely difficult to detect the perpetrators, and it is very necessary to check the carelessness which leads to so much damage.

Dundee is 42 miles from the seat of Magistracy, and the farthest portion of the District lies from 60 to 70 miles from the seat of Magistracy. This long distance prevents many cases being brought before the Magistrate, on account of the time and expense which the long journeys would entail. On this account it has been recommended that the portion of the District lying beyond Dundee should be added to the Umsinga Division.

For the same reasons the people about Dundee practically derive no benefit from the appointment of a District Surgeon.

The only Schools in the District are as follows:—One infant's school for European children in Newcastle, with an average attendance of about 20, and an annual Government grant of £36; a school for boys and girls at Dundee, with an average attendance of 20, and a grant of £—; this school takes boarders. A school for Natives, on the Berlin Mission Station, "Koningsberg"; this school has been established for some years, but it was only in 1878 that a grant was made for 1879 of £20. The average daily attendance at this school is 20 children during the day, and 30 men and women at night.

Two itinerant teachers receive an annual grant of £20; and there are two or three private tutors in well-to-do Dutch families. It is the intention of the Government, I believe, to build and establish a good Primary School in Newcastle, and this will be a very great boon to the whole District, and supply a great want.

It is much to be regretted that more cannot be done for the education of the native children. The only Mission Station is that of "Koningsberg," under the Rev. Augustus Prozesky, a missionary of the Berlin Mission.

Stock-breeding is the principal and most profitable enterprise, the District being particularly well adapted for the breeding of horned cattle, sheep and goats. Horses do fairly well, but require to be removed during the summer months to the higher lands of the Free State or Transvaal, to avoid the evil effects of the horse-sickness, which is most prevalent during the months of February and March. It must be remarked, however, that there seemed to be as much horse-sickness during 1878 in the Free State and Transvaal as there was in Newcastle Division. It is considered by some that the dry state of the country after the drought of 1877 favoured stock. At any rate, there was less sickness than usual amongst cattle and sheep during 1878.

There is a good supply of labour. Farmers allow natives to squat on their farms, and receive in return a regular supply of labour. The agreements, though, between farmers and their natives are all verbal and irregular. This causes much litigation, and gives rise to disagreeable disputes, which lead

to much bad feeling between the two races. I am sure this evil might in a very great measure be done away with, by enforcing a regular and compulsory system of written contracts, however simple.

There is a good deal of Crown Land still remaining in the District, and there are many anxious to purchase farms; but for the present the Crown Lands in the Colony are not open for sale. Crown Lands are leased by the Government for grazing purposes for six months at a time, at an upset price of a penny per acre, and many farmers, especially those whose farms are on high and exposed land, and those living in the Free State and Transvaal, avail themselves of this advantage. The climate is milder here, and healthier for sheep and cattle during the winter months, than on the high lands of the Free State and Transvaal, and *vice versa*. Those who live in the low lands in this Division, if they can afford it, remove their flocks and herds to the higher lands of the Free State and the Transvaal, during the summer months. The present system of leasing Crown Lands is open to many abuses and irregularities, and sadly requires amendment. During 1877 there were 31 leases taken out, and 25 were taken out in 1878.

On the Natives of the District I have reported separately: so I need say but little here. They are composed of Natal Natives, Zulu refugees, Amaswazi, and a few Basutos.

No census has ever been taken of the black population, but their numbers are approximately guessed from the number of huts, which is known from the Returns of the Hut-Tax Collection. The Returns for 1877 show a population of 10,070.

The Hut Tax collected in 1877 was £1,985, which, at 14s. per hut, represents 2,835 huts. In 1878 the collection amounted to £2,081 8s., which shows 2,973 huts. This shows a considerable increase in 1877.

The Hut Tax for 1878 has not yet been collected; but it is estimated that there was a further addition in that year of 100 huts. The increase is mainly due to the failure of crops in the Umsinga, and part of the Ladysmith Districts, which induced many to seek a home in this Division, where the seasons have been more favourable. There is no Native location in the District, and no large collection of Natives in any particular locality; but each man has a recognised chief or headman. All the Natives, with the exception of a few who are on Crown Lands for definite Government purposes, live on private farms, and furnish the labour required by their land-owners. They are an indolent people, and it is good for them that they are thus obliged to work. But they are well treated, and well off, and enjoy the full protection of the Law.

There is very little Crime amongst them, the most serious being "cattle stealing" and "faction fights;" the latter result chiefly from their beer-drinking parties, to which they are much given.

At present they only cultivate as much land as is required to provide for their home wants; but they are fast learning the advantages of using the plough: and the ready market, and the high prices which have lately been given for mealies, will no doubt spur them on to grow produce for sale, and to enrich themselves.

INANDA DIVISION.

As this Division has made great strides in progress during the last Year or two, I shall be justified in venturing upon a fuller and more elaborate description than the ordinary occasion would require.

GENERAL DESCRIPTION.

The Inanda Division has an area of about 482 square miles, 308,480 acres, of which 103,680 are in

the hands of Europeans, and 204,800 are occupied by Natives. It has a sea-board of about 18 miles, indented by the mouths of four rivers, the Umgeni, Umhloti, Umhlanga, and Tongati, which, with their affluents, the Umqekwa, Little Umhlanga, Umsunduzi, Mona, &c., would give abundant water supply, were it not for the continued accumulation of sand into which, in the lower part of their course, the streams are absorbed, and in some cases almost choked. The natural features of the country divide it, as do its occupants, into two distinct portions, the Coast Lands, and the great basin commonly known as the Inanda Location. Between these is a raised plateau of no great width, almost unrivalled as a Cattle Pasture, well watered, and capable, if enclosed and farmed, of supporting a large amount of animal life. The vast basin which lies behind this plain, and extends to the sources of the Umqekwa, Umhloti, and Mona is a mass of heaped hammocks, with narrow gorges between them, where drought prevails in all but unnaturally wet Seasons, but where Natives manage to live and thrive. It is scarcely necessary to attempt its description. The Coast belt is the seat of European industry, and for fertility and amount of Produce deserves to be called the Garden of Natal. Its natural features are swells of ground or knolls, with narrow valleys between, more or less clothed with bush—timber trees rarely occurring, and of no great size. Open Plains occasionally intervene, dotted here and there with ever-green clumps, in which the wild banana is generally conspicuous. Where nature has not been interfered with, the scenery is really park like. The soil is decidedly far above the average quality maintained in Natal. To judge by the results—by the strength and endurance of the Cane, by its continual yield, in spite of the slovenly cultivation which is the general rule, and which is generally attributed to want of Labour,—the soil must possess, in a remarkable degree, some of the chief elements of fertility; and this seems to be the opinion of all who have really given serious thought to the subject, notably to farmers and planters of experience lately arrived from Mauritius.

CLIMATE.

Climate is generally healthy, though the moisture which accompanies the Summer heat, makes it trying. Droughts, which have been hitherto occasional visitants, are becoming less rare in their occurrence, and it is to be feared that this may, in some measure be attributable to the clearing away of bush, which, if not checked, may entail still more serious consequences. The temperature ranges in Summer from 75° to 100°, and in Winter reaches 75°, but rarely descending to freezing point. The dry Seasons, such as the present, the pollution of the almost stagnant water by the refuse of distilleries, &c., is a fertile source of fever, which occasionally breaks out, giving warning that cannot safely be neglected.

ROADS.

The Main Coast Road from Durban to the Zulu Border runs through the Division, and is in good repair. The cross country roads or lanes, are, in the Southern part of the Division, numerous, and are, of necessity, kept in passable order by the Planters.

ANIMALS, BIRDS, AND FISHES.

With the exception of the Leopard, who still has his home in the deep ravines of the Inanda, and the Alligator, not yet dislodged from some dark pools in the less frequented streams, the zoology of this Division contains no creature dangerous to man. Wild cats and water-lizzards occasionally commit depredations in the fowl-house, and the grey monkey is very destructive in the mealie garden. Of Antelopes, the Inkonka (bush-buck), and the Ipwiti, vulgarly called *Petie*, are the most common. Partridges are fairly numerous, and in the spring months Quail abound. The Adidore, or Black Ibis, is sometimes shot in numbers on the lagoons, and is highly esteemed. Wild Ducks are to be met with, but never in large flights.

Fresh-water Fish are represented by the Eel, of excellent flavour, and attaining a large size ; the Mullet, a kind of Dace, and a yellow Fish, both belonging to the genus *Cyprimido* ; the Gudgeon, precisely similar to, but smaller than, his namesake in the Thames ; and, lastly, the Silnroid, a type which appears to be spread throughout the rivers and lakes of Africa, to which the careless nonenclature of Colonists has attached the name of Barbel ; although between him, and the well-known English fish of that name, there is not the most remote resemblance. Near the mouths of the rivers the Bream, from a few ounces to 3lbs., affords excellent sport, and when in season, a most savoury addition to the table. These, and many other Fish form a valuable item in the resources of the Division. At present, however, they are recklessly destroyed by millions ; and, unless the Legislature interfere, must suffer extermination. Nets, with the smallest possible meshes, continually sweep the sandy bottom of these streams, and no fish is so small as to be rejected by the Coolie. I have seen large baskets, full of fish, not two inches in length, carried off to form the national curry. Should the progress of sugar cultivation, and the importation of Coolies continue, the effects of this wanton destruction will be seriously felt.

VILLAGES.

Are Verulam, the seat of Magistracy and terminus of the railroad, Victoria, Blackburn, Bridgeford, Avoca, and Livingstone—all, with the exception of Verulam, owing their existence to the sugar-growing enterprise. The two last are rather in prospect than accomplished facts, but being both stations on the new Railway, their growth is likely to be rapid.

PRODUCTS.

Of these, Sugar stands first, and almost alone, having well-nigh superseded all other cultivations. Out of 20,000 acres, the amount supposed to be under cultivation by the white and Indian inhabitants, the cane crop occupies 14,700, and Indian Corn 3,783—leaving little more than 1,500 acres for all other produce. The crops this year appear to have averaged about one ton to the acre, and the prospects must be considered encouraging, as fresh land is continually being broken up, and estates rapidly find purchasers. How the soil is to renovated when exhausted is a problem, the solution of which, not yet attempted, must soon force itself on the attention of proprietors.

Coffee has been pronounced a failure, and on many estates the trees have been grubbed, to make way for cane. It has been suggested that cultivation and pruning had been practiced to an injurious extent, stunting the plants, and giving too much exposure to the soil ; and an opposite system has, in one instance, proved a great success. The experiment, however, it must be said, was made on an exceptionally fine block of land, and it yet remains to be seen how long the grand results will last. The crop of the whole Division last year amounted to 73,832 lbs. gathered from 405 acres.

A few Europeans still grow crops of maize—some to fill up the spaces between rows of young cane, and a few, in the more open country between the Umhloti and the Tongai, as the staple of their farms. But the principal producer of Indian corn is the free Indian, who, having served his term of indenture has settled on the land, and is, with two or three exceptions, the only farmer in the Division.

Arrowroot is still grown in small quantities, but the price does not appear sufficiently encouraging. Garden Produce, with the exception of sweet potatoes, is disgracefully scarce, but for the free Indian ; it would be unattainable. Fruit, which should be plentiful, and of infinite variety, is also scarce, and, as a rule, inferior in quality. The pine apple, especially, has been allowed to degenerate, till, in comparison with its original flavour, it is tasteless. The mango, in all its varieties, seems to flourish, but is yet a rarity in the orchard.

 THE POPULATION

Is statistically divided into three classes, each of which, however, admit of sub-division. Under the head of Europeans are found English, French, and Creoles. Among the Coolies are Indians from Calcutta, from Madras, and from Mauritius; while among Natives appear not only the members of our own tribes, but Amatongas, and others from the Northward, besides a number of liberated slaves from the Portuguese territory, dispersed as servants among the planters. A few Chinese work on the railway, and add to the Babel of languages. In the European population an evident revolution is in process. English settlers are giving way to emigrants from Mauritius, of French or Creole origin. Several large and important estates have passed into their hands, and their influence—political and social—cannot but make itself felt. Already has the necessity arisen for an interpreter of their language at the Magistrate's Office. Of the indentured Coolies there is nothing to tell which would distinguish them from the rest of their fellow-countrymen. I have not yet been able to ascertain the number of free Coolies, who rent land in this Division. Many of them pay £1 an acre as rent, and several will appear upon the next voters' roll, as coming under the franchise of £10 rental. Their numbers already exceed 200, and I hear constantly of new leases drawn up. It seems probable that as their time of indenture expires, many of their countrymen will follow their example, forming an appreciable element of our settled population. The Natives are, as a rule, prosperous and contented. Their hut-tax was cheerfully and readily paid, and in most cases seemed to be paid out of their abundance. They are singularly amenable to rule, and with the exception of an occasional riot, which appears necessary to clear the moral atmosphere, gives very little occasion for magisterial interference. This, however, applies chiefly to those within the Location, and removed from immediate contact with the white man. The Kafirs inhabiting the lower part of the Division are very much addicted to rum and "shimiyana," and consequently to theft and assault.

LABOUR

There is little to be said on this head. Wages of natives are high, but the introduction of Coolies has afforded relief to the planter in this respect.

Very great changes may however be expected, as the result of the completion of the railway; changes which few probably are able as yet to anticipate, still less to realize.

 GREAT TUGELA DIVISION.

AGRICULTURE AND STOCK FARMING.

Stock farming is not pursued in this Division as a means of support; the pasturage is neither suited to horses or sheep, and for the most part supplies of horned cattle are procured from traders in Zululand.

The products cultivated are sugar cane, coffee, tobacco, arrowroot, and Indian corn; the cultivation of cotton has been given up for some years past.

Sugar.—This is the favourite staple with planters, and an increase in the acreage under crop is reported of 91 acres during the year.

Coffee.—The cultivation of this plant shows a decrease in the acreage under crop; this is accounted for by some estates abandoning part of their plantations in consequence of disease attacking the trees. Acreage in 1877, 1,366; 1878, 1,202; decrease, 164.

Tobacco.—Although in good favour with planters, is found rather difficult of sale, which must, I presume, to some extent account for reported decrease of land under crop of 15 acres.

Arrowroot.—This product is cultivated at present on three estates only, and the acreage under crop shows a decrease of 106 acres.

Indian Corn.—There is a considerable increase (452 acres) reported in the extent of land under this crop; this may be accounted for by the high price obtainable for some time past for mealies.

The crops that receive attention from agriculturalists in other parts of the Colony, such as oats, round potatoes, etc., are not grown in this division for sale, and therefore on a limited scale only.

The products manufactured and prepared for market are sugar, coffee, arrowroot, rum and tobacco. The quantity of each manufactured are shown in the Agricultural Returns, AA.

The number of sugar mills in operation is 6, arrowroot mills 2.

The public roads throughout the Division have been well and practically looked after, and compare favourably, I am assured, with other roads in the Colony.

Labour continues as scarce as during past years, and employers, as a rule, experience considerable difficulty in obtaining a sufficient supply to meet their requirements. Coolies are employed on a number of estates, and, as a rule, give satisfaction.

Progress of Agriculture.—There is nothing new to report under this heading, unless it is that a few planters are giving the cultivation of tea a trial, and with some apparent success. Prices of stock and produce cannot be quoted in a reliable form, inasmuch as sales rarely take place on the estates. Durban prices, whither stock and produce are taken for sale, can alone be given. There are no fairs or markets established in this division, and auction sales are seldom held.

Stock.—Cattle farming, or more properly speaking, cattle rearing, is not carried on in this Division; reference, therefore, can only be made to working oxen, milch cows, and young stock on estates, and possessed by transport riders and farmers; the number of such is returned at 4,134 in 1877, and 3,889 in 1878—decrease 245. The decrease in the number of horned cattle held may be accounted for by the unlimited demand for trek oxen for some time past.

The quantities of pigs, sheep, and goats always vary very much. The increased price of mealies for some months past would render pig-feeding unprofitable, and the troubles in Zulu Country would prevent traders from bringing sheep as usual to replenish exhausted flocks; so that it is not to be surprised at that a decrease in the number held should be reported.

CRIME.

I regret I cannot report very favourably under this head. Two murders of a deliberate character were committed during the year, one case of shooting with intent, one of rape, two of arson, and two of housebreaking and theft. The other cases, however, were of a much less serious character, and such as could be dealt with by the local Court.

INHABITANTS,

As to numbers, are about the same as last year. There has been no new arrivals or farms occupied. For the most part the residents are engaged in agricultural pursuits. The latter part of the year having proved propitious for crops, I consider it may be said that a general condition of prosperity exists. The plantations and farms present an appearance that warrants such a conclusion.

UMVOTI COUNTY.

In forwarding the Statistical Returns, there are but few points that call for remark.

The health of the District, on the whole, has been good—as shown by the Returns of Births, Deaths, &c.

The year has been fairly favourable for cattle and stock of all kinds, with the exception of sheep, among which heavy losses were sustained by farmers, owing to scarcity of grass at the lambing time, the consequence being that numbers of lambs died, thereby greatly reducing the proper rate of increase.

The very serious drought experienced during the last season, has had the effect of raising the prices of mealies, forage, and other produce, to high prices which have been unprecedented in this locality; the natives living in the thorn districts in particular, feeling the effects of it. The presence of large bodies of the military in the district, during the year, has also tended to raise the prices of necessaries. A favorable change in the weather has taken place, however, and should it continue as it promises, very fair crops may be looked forward to during the year. Owing to the great demand for transport, consequent upon the military movements, cultivation has to a certain extent been neglected.

Nothing of importance, with the exception of the passage of the troops through, and temporary sojourn in this County, and the adoption of this route, for their conveyance to the upper districts, thereby causing a change in the usual aspect of the place, has occurred during the past year.

At present all is activity, and, preparations are being made for a settlement of the long existing Zulu difficulty, which settlement is nowhere more anxiously desired than in the Umvoti County, this district being separated from Zululand by the Tugela River, which is fordable during the greater part of the year.

WEENEN COUNTY.

Owing to the alarm existing throughout the County at the time when the statistics for the past year were being collected by the Field Cornets, a great many residents were absent from their homes, having either left the County or withdrawn to less exposed localities than those in which their farms are situated. A very large number also of the natives—Indunas, heads of kraals, and others—were also absent on military service for the Government, and, in consequence, the information collected is necessarily very imperfect, and even less reliable than usual. It is, therefore, useless for me to offer any comments upon such imperfect statistics.

So far as the European inhabitants of the County are concerned, the past year has been a prosperous one. The movements of troops incident to the political state of our relations with Cetuywayo, paramount Chief of the Zulus, caused a great demand for wagons and oxen to carry the large quantities of supplies required to form depôts in Pietermaritzburg, and at different points on the Zulu Border, and also to accompany the troops on their march into the Zulu Country. This demand naturally caused a great increase in the rates of transport and in the price of working oxen, whilst the requirements for such supplies of food and forage for the troops as were obtainable in the Colony also raised very materially the prices of slaughter animals and agricultural produce,—all tending greatly to the profit of the transport-riders and producers; and many of the residents in this County combine the business of transport-riding with that of farming. Forage, usually sold at from 6s. to 8s. per cwt., rose to 18s.; mealies

went from 10s. per muid up to 40s., and even 50s. ; and the prices of other produce rose in like proportion ; whilst the rates of transport from Pietermaritzburg to Estcourt also increased from 3s. 6d. to 4s. per cwt., up to as high as 14s. per cwt., and the rates for hire of wagons and carriage of goods elsewhere were proportionately increased, and people generally were doing so well that it was almost impossible to find any suitable men in the County willing to accept Commissions in the Native Contingent raised at the end of the year ; although what in ordinary times would have been considered very fair terms were offered. Up to the end of last year very little alarm was felt in the County, notwithstanding the evidently approaching and finally occurring disruption of our previous peaceable relations with the Zulu King—people believing that proper measures would be taken to prevent any great risk of inroads from beyond the Tugela. In November, I received instructions to raise Native Levies for military service, either within or without the Colony, as might be required. Some reluctance was exhibited by the natives at first in obeying the order to muster, not so much from any feeling of disloyalty, as partly from their usual dilitariness, partly from the conflicting claims of the Government on the one hand and on the other of their landlords and employers—many of the natives residing on private farms—and partly also from their dread of the warlike prowess of the Zulus. However, without very much delay, all the men called for by the Government were forthcoming, and the following are about the numbers supplied for military service from Weenen County :—Men of Umkunga's, Umdomba's, Umganu's, and U'Pagadi's Tribes, forming the late 3rd Regiment Natal Native Contingent, under Commandant Lonsdale, about 1,500 ;* Jahu's men, and men of the Amangwe Tribe (late Putini), forming part of the 1st Regiment N. N. Contingent ; of the former 225, of the latter 300 ; Basutos, under Hlubi, all mounted men, about 50 ; in all considerably over 2,000 men. When the men were once mustered and prepared to start for the front, they showed no lack of military spirit or enthusiasm ; indeed, at the end, more men of some tribes turned out and joined the Levies than were called for. U'Pagadi, for instance, was required to find 600 men, but he actually supplied about 730. The Chiefs themselves evinced the utmost loyalty, and an earnest desire to carry out, as far as possible, the wishes of the Government ; but their power over their people is being gradually, but surely weakened, and they no longer possess any despotic authority over them, at least, in this County ; although when, as in this case, they are acting under the distinct orders of the Government, they are necessarily supported in carrying out such orders, so far as they do so fairly and justly.

The Natives in the lower or thorn districts suffered very severely from scarcity of food ; their grain crops failed even more completely than during the previous years, and this was the fourth succeeding year of deficient crops. Fortunately the crops in the Upper Districts were remarkably good, and the Natives there had, consequently, considerable quantities of grain to dispose of, but the demand being considerably greater than the supply, and many of the wagons which, in ordinary times, would have been employed in carrying mealies to the distressed Districts for sale being more profitably employed elsewhere, the prices naturally rose very considerably—a good cow being sometimes bartered for a single sack of grain. To aid those who were most distressed, I was authorised to procure mealies for sale to such Natives as desired them, using my discretion as to requiring cash payments or giving credit. A good many muids were sold for cash, and a considerable quantity also on the credit of the Chiefs or heads of kraals. Some of the debts thus incurred have been already discharged, and I have no doubt

* About 2,000 men in all were supplied by these Chiefs for this Contingent, but the remainder were drawn from those parts of their tribes residing in Klip River, Umsinga, and Umvoti Districts.

that by the end of the present year all will be honestly paid off. I cannot finish this part of my Report without again recurring to the unshaken loyalty and trust in the Government which has been evinced by the Native population, and to the absence of any marked increase of crime among them, notwithstanding the unsettled state of the County, and the great scarcity of food under which so many have been suffering.

The Roads throughout the County have, on the whole, been maintained in good order, although the main road has been considerably cut up by the continued action of frequent storms, and heavy and incessant traffic.

The only Public Work of importance which has been in progress during the past year is the Tugela Bridge, the masonry of which is approaching completion, and part of the iron work already erected. There appears every prospect of this very important work being completed for traffic before the next wet season sets in.

UPPER UMKOMAAS DIVISION.

As regards the Population, there has been the usual natural increase amongst both the Europeans and natives, but there has been no immigration of either class. Both classes have, however, greatly increased their material wealth, and there is not a single instance, to my knowledge, of any sober and industrious European who is not in comfortable circumstances and increasing his means. The high prices of every kind of farm produce, and the high rate of transport, added to their own energy, have contributed to this happy result. As regards the natives, the same causes have operated in their favour, and they are a race who are eminently fitted for taking advantage of any favourable opportunity for sale or barter. In favourite localities they frequently pay as high a rental as £5 per hut per annum, and in good seasons are well able to pay it, but the land question is one which is causing great uneasiness to the thinking portion of this community, and is one which must be dealt with at no distant period.

Notwithstanding the Zulu war and the various complications with distant tribes of natives all over South Africa, I have never had a suspicion of disloyalty existing amongst the natives of this Division, their sympathies and interests being entirely on the side of the Europeans. They have pretty fairly answered to the requisitions made on them to supply servants, wagon-drivers, and foreloopers, for the use of the military authorities, much as they dislike the service.

As regards crime, there have been fewer cases of serious offences against the person than for the last two years, and the thefts of cattle and sheep have certainly been less.

The area of ground under cultivation has increased very considerably during the last season, more especially on the land held by natives, some of whom have now a very large acreage under maize; the possession of wagons, which was a short time since exclusively in the hands of Europeans and Kafirs on Mission Stations, has now extended to outside natives, many of whom are now largely engaged in transport. The Hut Tax was paid last last year with the usual willingness and promptitude.

UMSINGA DIVISION.

The boundaries of the Umsinga Division are defined by Government Notice No. 209, June 22nd, 1874 ; the area is estimated at 2,916 square miles, a little more than one-third being Native Location Land ; and has a frontier Zulu Border of about 60 miles of very broken stony country along the Buffalo River, near which there are clusters of aloe, mimosa, and brush-wood. This Division is about to be enlarged by the extension of the present boundaries further into the Divisions of Ladysmith and Newcastle ; this is being done for the convenience of the inhabitants residing beyond the present boundary of this Division, who are at too great a distance from Ladysmith and Newcastle seats of Magistracy, and consequently crimes and grievances have been overlooked, especially by farmers who could ill afford to leave their stock while travelling to and fro, to lodge their charges, and again appearing for the hearing of their cases. There has been very little disease amongst stock, but the drought and want of grass impoverished the stock to such an extent that many died ; latterly a great improvement, the grass being remarkably good in the highlands.

As regards agriculture, there has been a continual failure in crops in the Tugela Valley for several years ; consequently large numbers of natives have entirely left, others only for a time for the purpose of procuring food in other parts of the Colony, from friends and very little will be reaped by the few natives left in the Tugela Valley. But in the higher land, the crops have improved so wonderfully by the rains which came only just in time, and at favourable intervals, that a fair crop may yet be looked forward to. The gardens are not kept free enough from weeds, and the seed too thickly sown ; there should be space enough to admit and cause a good current of air ; this advantage is gained by planting in rows a good distance apart. There are now double the number of ploughs in possession of the natives to what they had this time last years.

The European farmers devote their attention chiefly to stock farming, and are wealthy.

Gold has been found at the junction of the Tugela and Buffalo Rivers, but has not yet proved payable. There are rich specimens of lead, with a fair percentage of silver. There is one coal mine of superior quality E.S.E. of the Job's Koep (or Elenge Mountain), and indications in various other parts of the Division. There is abundance of stone in variety, including lime stone and slate in thick flakes.

Fish, in excellent quality, size, and in abundance, in Tugela and Buffalo Rivers, also in Mooi River.

In March and April, 1878, a Special Commission, consisting of the Hon. M. H. Gallwey, Attorney General, the Hon. J. W. Shepstone, Secretary for Native Affairs, and Col. Durnford, Royal Engineers, met at Rorke's Drift to enquire into the long unsettled Boundary Question between the Transvaal and Zulu country.

On the 28th July, 1878, Mhlokazulu, the chief son of the Zulu chief Sirayo, crossed the Buffalo River into this Division with a mounted force numbering thirty, armed with guns, and a large force on foot, armed with guns and assegais ; they took by force from the Frontier Border Police, at a kraal below Rorke's Drift, one of Sirayo's wives, who had, a few days previously, fled to Natal. Subsequently another Zulu woman was pursued and taken back into Zulu country, and there finally brutally murdered.

During the year there have been many deaths registered by natives, chiefly children and elderly people, which may be owing to the drought and therefore the scarcity of good water.

There is very little game in this Division now.

ALEXANDRA COUNTY.

AGRICULTURE.

The principal Crop grown in this County by the European population is Sugar Cane.

In consequence of the unprecedented drought which prevailed during last year, the yield of Sugar has been considerably short of the estimate, on several estates as much as one-third. The next season's, and also the following season's crops, are materially injured through the same cause, many of the cane shoots having partially or wholly died out.

At several of the mills where Sugar is manufactured by the vacuum process, an excellent sugar is made, and during the year has commanded a highly remunerative price in the Durban Market. For a considerable portion of the more inferior sugar made by the wetzel pan process, a ready market is found in Griqualand East, and, were roads opened up across the Berg, considerable quantities would be sent in that direction into the Cape Colony. No new mills have been erected during the past year.

RUM.

Another product of sugar cane is Rum. In consequence of the want of water, no Rum has been manufactured during the past season in the County.

COFFEE.

Coffee is not a favourite article of growth here. At one time there was a considerable acreage planted, most of which has died out. A few small plantations still exist, to which a few additional acres have been planted during the past year. The crop gathered was very poor.

CAYENNE.

Three plantations of capsicums for making Cayenne or red pepper were increased a little during the year, and, as this plant did not suffer from the drought as other crops, it yielded a better return for the outlay than most other products. Several other articles have been tried, such as Ginger, Tobacco, &c., but the sale is limited, and they are only grown in garden quantities.

MAIZE.

The Maize Crop generally, both by European and Natives, was very light, and in dry soils almost a failure.

The ruling price of this staple has been and still is high, and there has been a scarcity of food among the Native population, although no actual starvation. Many of the natives, especially women and girls, have augmented their food supply by gathering and eating shell-fish and wild roots, much more than in favourable seasons.

LIVE STOCK.

Cattle have been tolerably healthy although poor, and neither pleura-pneumonia (lung-sickness) nor red water have had so many victims as in past seasons. The County, however, is never entirely free from those deadly diseases.

The prices of Cattle have ruled unusually high, in the latter part of the year especially.

HORSES.

Horses have also been tolerably healthy during the year. A kind of fever has been prevalent, but only few deaths have occurred from it. The disease known as horse-sickness has not been so fatal as it frequently is, and all kinds of Stock remain pretty much the same as usual.

TRANSPORT.

Transport has been scarce in consequence of the poverty of cattle and scarcity of food, and, although rates ruled higher than usual in the County, yet not so exceptionally so as in other parts of the Colony.

NATIVE LABOUR.

Labour by Natives decreases, and although there has been and now is a scarcity of food at the kraals, yet the young men and lads preferred to sit idle at their kraals hungry rather than to turn out to work on the estates, where they would have had plenty of food.

COOLIE LABOUR.

Coolie labour has been greatly increased during the past year, and is fast superseding Kafir labour, as being more reliable, less troublesome, and not much more expensive.

PRICES CURRENT.

For all staple articles of food prices have ruled high, Maize and Rice unusually so.

STORES OR SHOPS.

The County is well supplied with Stores, where all necessaries and many of the luxuries of life can be bought.

There are three at Umzinto, three at Umkomas, two at Ifafa, one at Equeefa, one at Umtwalumi, and one at Udmasina, besides Kaffr Trading Stations at other outlying places. Spirits are sold at most of these places.

LICENCED HOUSES.

There are Licenced Houses of Accommodation for Travellers at Umkomas and Umzinto.

PUBLIC HEALTH—EUROPEANS.

This officer reports that there was no serious outbreak of disease among the European population during the year. Dengue fever and other minor complaints were prevalent, mostly in a mild form.

DEFENCE.

The only organisation for the defence of the district is the Alexandra Mounted Rifle Corps, which has been in existence many years, and numbers at present thirty-five effective members. This corps is at present on active service in Zululand. There is, therefore, no organisation in the district at present for its defence.

BRIDGES AND FERRIES.

Bridges there are none. At the Ferry at the Lower Drift of the Umkomas, there is a punt capable of carrying a wagon, and at the Lower Drift of the Umzimkulu there is a boat capable of carrying a wagon in pieces, or two or three horses at once.

GRASS FIRES.

Reckless grass fires have caused considerable loss of property during the late dry season, and this kind of mischief requires to be put under better control than at present.

CRIME.

There have been no serious cases of crime happen in the County during the past year. Where there are so many Coolies, minor offences will always be prevalent.

DRUNKENNESS.

Drunkenness among the Native population has been on the decrease during the latter part of the year in the neighbourhood of Umzinto.

ALFRED COUNTY.

It is very difficult to find matter to report in the affairs of the County of Alfred. Its history remains the same year after year; the populations slowly increases; one year lungsickness is rather worse than another, and the crops differ slightly; this year there is a promise of a very good crop, but the lungsickness has been very bad indeed. The commercial progress of this and the surrounding District will not alter much till the Umzimkulu mouth is opened for trade; I hear its navigation will probably soon be attempted by private enterprise.

The natives remain peaceful, contented, and loyal. The war raging on the other border might be thousands of miles away for all the effect it appears to have on the equanimity of the tribes in the remote County of Alfred.

IXOPO DIVISION.

The Division continues to be thinly populated by Europeans, although the Returns show a slight increase, and a proportionate advance in produce on those of last year.

There is no doubt about the healthiness of the climate, and the Country being well adapted for sheep, horses, and stock generally, as well as deserving the name of a grain-producing District, must eventually induce practical farmers to settle on lands at present lying idle, or squatted on by Natives, who cannot as yet adequately use the soil economically, and at some future day this extensive tract of land be made the centre of industry, prosperity, and wealth.

When Crown Lands are opened for sale, it is anticipated that many intending settlers will purchase ground.

The main road to Harding, Kokstad, and the Cape Colony, passing through the centre of the Division, is kept in order. The Umkomanzi cutting, which was narrow, and consequently dangerous is now being widened, and two good punts are on the principal rivers. The bridge over the Ixopo, stream, intended to be built, is sadly required, and will prevent delays, which the post-cart and other traffic is at present subject to, the drift being deep and bad to cross when the water is high during the rainy season.

There are many Natives, and it is difficult to keep others from several parts of the Colony coming here. Open land, good for stock and crops, less subject to drought, are reasons for their preferring to live here than elsewhere in Natal. Those who are here have in almost every instance done well. Upon the whole, I believe they are more independent, and in better circumstances than in any other part.

It is always difficult to take the census amongst Natives, and they are therefore as yet only

approximately given. The amount of ploughs, I should say, can be taken as a fair estimate, and goes far to show that little is now done here with the hand hoe.

In the upper part—or, as it should be called, the Ipoela Division—the Natives possess a great many horses ; indeed, I should think that every man owns one or more horses, and it is not uncommon for one to possess four to five riding horses. They will, however, not sell : they have all they want, and appears to appreciate a good mount as much as the whiteman, when he can afford it.

The payment of the annual Hut Tax, besides other, in some instances, heavy fines, there appears to be no difficulty, and they seldom feel disposed to enter service, having enough for all their wants without. Chiefly only those on private lands work for the proprietor.

The year has been a good one for stock, although towards the end of the winter the new kind of fever amongst horses so prevalent throughout the Colony, has shown itself in the lower part of this Division, and carried off several animals. I have not heard of any cases of this kind, or of that usually known as horse-sickness, occurring in the Ipoela Division.

The threatening attitude of the Zulus occupies the attention of both the white and black inhabitants, and unsettles all.

The Amabaca are generally considered the most loyal tribe here, but they are certainly the most troublesome in their relations towards the whites as masters.
